Response to Arguments

Applicant's arguments with respect to claims 1-91 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-91 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant(s) regards as the invention.

Taken as a whole the claims recite an undue multiplicity of claims by virtue of the unreasonable number of claims present tend to obfuscate, confuse, and becloud the claimed invention. Applicant(s) is/are required to select certain claims, for examination on the merits, See M.P.E.P. 2173.05(n). To be complete the non-selected claims must be cancelled or the applicant(s) must present appropriate arguments as to why the above rejection is in error. Note most patents have less than twenty claims while patents in excess of 100 claims comprise less than 0.35% of all applications filed (See Federal Register: October 5, 1998 (Volume 63, Number 192, Page 53507)).

Applicant(s) is/are being afforded the courtesy of a written response due to the complexity of the case.

It appears clear that applicant is well aware that applicant has filed a large number of claims. Therefore if applicant would select a set of 10 claims or less of examination purposes. Examiner would be able to continue with examination of the present application.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 1 provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 16 of copending Application No. 11/254,216.

Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 1, anticipates the features of claim 16 in application 11/254,216, teaching the same features.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim 48 provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 16 of copending Application No. 11493940 .

Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 48, anticipates the features of claim 16 in application 11/254,216, teaching the same features.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
